

Akira AI is SaaS Platform for Explainable AI and ModelOps

1. Explainable AI and Responsible AI
2. Privacy and Preserving AI
3. ModelOps and Visual AI

Akira.AI - Enterprise AI Platform for Explainable AI and Privacy and preserving AI with ModelOps.

## Team

**Founder - Dr. Jagreet Kaur Phd**, Author and 10+ years of Experience in Academics and Research

**Co-Founder - Navdeep Singh** 18+ years of Experience in Cloud Native Transformation

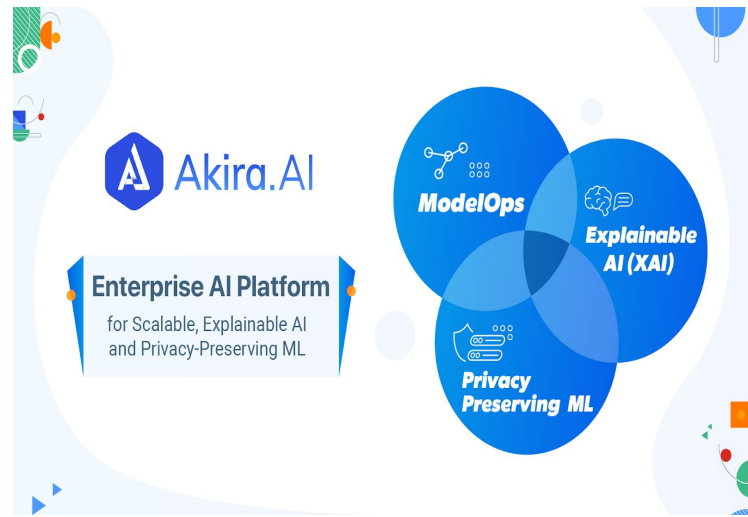

- 30 Years of Domain Experience in Research and Development
- Technology & Business Domain expertise.
- Researchers and AWS Certified Solution Architects and Engineers Team

### Akira AI Go To Market Initiatives:

We Aim to become the Top Enterprise AI Platform for Explainable AI and ModelOps, providing Solutions for Responsible AI and Implementing Data Privacy by Design provider solutions for assisting the AI journey of Enterprises in a responsible, transparent and ethical manner by managing machine learning throughout the lifecycle of data,

Plan is to achieve this by:

- Targeting healthcare, Insurance, Marketing and Financial Industry
- Marketplace Setup on Cloud Providers
- Product Demonstration at Events & MeetUps

### Why Akira AI?

- Simple, Secure and Customizable Platform
- Data Privacy by Design
- Tracing AI Decisions
- Running AI at Scale and Cloud Agnostic
- Advanced Monitoring at Scale
- Service ML catalog

### Area Of Focus:

#### Technology Stack

Rust  
Golang  
Web Assembly  
Microservices  
Kubernetes  
Apache Flink  
AI Algorithms  
GPU

#### Features

- Enterprise AI Platform for scalable, Explainable AI and Privacy-Preserving ML
- Cloud Native Capabilities and AI at Scale
- Model Management with Tracing AI Decisions
- Streamline Model Governance for making decision Explainable
